

St Osmund's Reception – Easter Holiday Pre-learning Tasks

In preparation for the summer term, here are some pre-learning tasks to complete over the Easter Holiday.

Letter formation practise.

Please help your children to practise their letter formation using the Read Write Inc. rhymes to help them.
(sheet for guidance included)

Maths.

We will begin to look at measures next term. To prepare the children with some language related to this topic (tall, long) we would like the children to take part in a measuring activity. Children will need to lie flat whilst a grown up 'measures' them by putting a marker by their head and feet. If you have masking tape, stretch this alongside your child between the two markers. This will represent their height/ length. After this, the children can use everyday objects such as pieces of pasta, crayons, toy cars, duplo or lego pieces to match the length of the tape. See if they can count each object and come to a total. Please take a photo of this activity.

The Farm.

At the beginning of next term (Monday 22nd April) we will be visiting Bocketts Farm. Please share the following video with your child(ren) over the break to help familiarise them.
